SUMMARY

Results-driven technical leader with 6+ years of experience building, launching, and scaling software products at world-class organizations. Demonstrated expertise in full-stack development, AI integration, payments, and infrastructure, with a proven record of setting technical vision, leading teams, and driving product adoption. Adept at bridging engineering, business, and user needs in ambiguous, high-growth startup environments.

EXPERIENCE

Senior Product Manager, Technical Lead Microsoft • azure.microsoft.com

03/2021 – Present
Redmond, WA

- Set technical direction and led cross-functional team of 12 engineers and designers to deliver scalable **infrastructure** and **developer tooling** features for **Azure DevOps**, increasing enterprise adoption by 35%.
- Architected and launched integrations with **AI providers** and internal APIs, enabling intelligent automation and boosting user efficiency for 10K+ teams.
- Drove system design initiatives focused on reliability and high availability for mission-critical platforms handling millions of daily operations.
- Collaborated directly with product, sales, and founder teams to align technical roadmaps with customer needs and business objectives.
- Conducted technical discovery and sales development calls with Fortune 500 clients to bridge feature gaps and surface new product opportunities.
- Implemented agile processes and OKR framework improving team velocity and alignment by 50%; championed experimentation with latest **AI tools** and dev workflows.
- Launched 3 major platform features that generated \$2M additional annual revenue through improved payments and billing integration.

Product Manager, Platform & Payments Amazon • amazon.com

06/2018 – 02/2021
Seattle, WA

- Owned technical product lifecycle for **seller tools** and **payment infrastructure** serving 100K+ merchants, driving satisfaction scores from 3.2 to 4.5 stars.
- Designed, specified, and shipped **payment system integrations** and automated risk controls, reducing fraud incidents by 18%.
- Spearheaded cross-team collaborations with engineering (3 time zones), QA, and UX to optimize APIs and developer tools, reducing support tickets by 25%.
- Engaged in customer, stakeholder, and sales calls to directly inform technical roadmap and shape platform architecture for scalability.
- Presented quarterly business reviews to VP-level leadership, translating technical metrics and system design decisions into strategic business outcomes.

KEY PROJECTS

AI-Augmented Product Prioritization Tool • Internal Tool • github.com/sarahjohnson

- Built and maintained an internal **full-stack web app** integrating **AI-driven analytics** and decision models, used by 50+ PMs for data-driven product planning across the organization.
- Developed modular backend (Python/Node.js) interfacing with **AI services** (OpenAI APIs), and secure payment and authentication flows.

Open-Source Product Management Framework • Open Source • github.com/sarahjohnson/pm-framework

- Created a developer-focused framework supporting API integration, AI-driven insights, and rapid experimentation; 1,000+ GitHub stars.

TECHNICAL SKILLS

Backend: Python, Node.js, SQL, API Design, Payments/Fintech Integrations, Scalability

AI/ML: OpenAI API, Prompt Engineering, AI Integration, Data Analytics

Infrastructure: Azure, AWS, System Design, CI/CD, Monitoring

Frontend: React, TypeScript, Figma, Prototyping

Product/Process: Agile/Scrum, A/B Testing, Stakeholder Engagement, Roadmaps

Certifications: Certified Scrum Product Owner (CSPO), Google Analytics IQ

EDUCATION

MBA in Technology Management • Stanford Graduate School of Business • Stanford, CA • 2018 • GPA: 3.9/4.0
Dean's List, Product Management Fellowship

B.S. in Computer Science • University of Texas at Austin • Austin, TX • 2016 • GPA: 3.7/4.0
