SUMMARY

Entrepreneurial full stack product and engineering leader with 6+ years of experience at top tech companies driving technical strategy, architecture, and product delivery. Extensive expertise in scalable systems, AI-powered tool integrations, payments infrastructure, and developer-facing solutions. Proven ability to define and build products from zero to launch, collaborating cross-functionally to bridge business and engineering needs in dynamic, ambiguous environments.

EXPERIENCE

Senior Product & Engineering Lead Microsoft • azure.microsoft.com

03/2021 – Present
Redmond, WA

- Spearheaded technical vision and system architecture for **Azure DevOps**, scaling infrastructure to support 150K+ enterprise users across critical deployments.
- Led design and implementation of **AI-powered developer tools** integrated with third-party APIs and enterprise payment systems, reducing onboarding time by 40%.
- Owned and delivered end-to-end backend solutions for complex workflows, utilizing **microservices**, **cloud-native** patterns, and robust API strategies.
- Acted as technical liaison with product and sales, conducting forward-deployed engineering calls to elicit user feedback and align solutions with customer needs.
- Built integrations with third-party providers, payment gateways, and internal tools, accelerating roadmap delivery by 6 months.
- Mentored and managed a team of 12+ engineers and designers, establishing agile processes and fostering an ownership-driven, collaborative culture.

Product Manager & Backend Engineer Amazon • sellercentral.amazon.com

06/2018 – 02/2021
Seattle, WA

- Engineered full stack enhancements to seller tools platform serving 100K+ merchants, focusing on backend reliability and real-time payment analytics.
- Designed and launched **AI-integrated features** that improved seller engagement by 35% and introduced ML-driven fraud detection for payment workflows.
- Led API and developer portal revamp, enabling faster third-party integrations and reducing support requests by 25%.
- Orchestrated cross-team solutions with engineering, product, and business stakeholders across multiple time zones.
- Presented business and technical roadmaps to executive leadership and iteratively delivered product improvements informed by direct user feedback.

TECHNICAL & LEADERSHIP SKILLS

Languages: Python, SQL, JavaScript (Node.js), Typescript

Frameworks/Infra: REST APIs, Microservices, Azure, AWS, Serverless, Docker

AI & Analytics: AI tool integrations, ML APIs, Product analytics (Mixpanel, Amplitude, Google Analytics), Data analysis

Payments & Developer Tools: Payment system integration, Fraud detection, API design, Developer tooling

Leadership & Collaboration: Cross-functional team leadership, Agile/Scrum, Stakeholder management, Product strategy

KEY PROJECTS & RECOGNITION

Product Prioritization Platform • Internal Tool

- Built and scaled an internal tool used by 50+ PMs to optimize product roadmap decisions, integrating user data and payment metrics for actionable insights.

Open-source Product Management Framework • Creator • github.com/sarahjohnson

- Developed and maintained a framework adopted by the open source community with 1,000+ GitHub stars, streamlining developer onboarding and analytics integration.

Awards: Product Manager of the Year – Microsoft (2023), Innovation Award – Amazon (2020)

EDUCATION

MBA in Technology Management • Stanford Graduate School of Business • Stanford, CA • 2018 • GPA: 3.9/4.0
Dean's List, Product Management Fellowship

B.S. in Computer Science • University of Texas at Austin • Austin, TX • 2016 • GPA: 3.7/4.0
